

# INTERNATIONAL SUMMIT OF EDUCATION FOR THE FUTURE

## PRESS RELEASE

### 50 speakers from around the world

From **April 20th to the 30th 2022**, the International Summit of Education for the Future will bring together some fifty speakers from all over the world, **specialists in education** of course, but also **inspiring people** whose experience, vision, background and wisdom can be a magnificent asset for the world of education, people from different backgrounds: the arts, philosophy, agriculture, architecture, science, economics...

### An event in French AND in English, ONLINE, LIVE and OFFERED to ALL

Thanks to the Huguette Helmann Foundation (Belgium), **all the conferences will be translated simultaneously in audio by a team of professionals.**

In order to be open to all countries and to reach as many people as possible across the 5 continents, it will be **offered to the world**, financed by the solidarity and generosity of the participants or some of the speakers.

### For a meaningful education, a flourishing humanity and a breathing earth

ISEFF 2022 - International Summit of Education for the Future - aims to foster, worldwide and in all humility, the implementation of a meaningful education, an education that fosters the evolution of a world where ethics, solidarity, peace and collective and planetary interests are the basic values of all individual and collective undertakings.

The wise Amerindians used to say: **we did not inherit the earth from our ancestors, we borrow it from our children.** In the chaos of this world, it is more and more urgent to act to give back to our children a **world that has a HEALTHY and SUSTAINABLE future**, for the greater good of all, and of the planet.

### Beyond the online event

**An English-language platform of links and resources** has been created to allow summit participants and other education enthusiasts to connect with each other, exchange, and even collaborate by sharing information and resources.

**From May 1st to the 8th**, a wiki space will allow anyone, anywhere in the world, to independently set up a web event: mini-conferences, round tables, interviews, workshops, sharing, guided tours, shows, concerts, etc.

In the spirit of the International Summit on the Education of the Future, we propose to create **an online training platform** that will have an impact all over the world, with teachers from the 5 continents and coming from various paths of expertise in education, paths of wisdom, or paths of learning, creativity and innovation.
